

Safe & Efficient Transition Hose that's Easy to Install

Flexible

DRYER FLEX

**DryerFlex™ Outperforms
Semi-Rigid and Slinky
In Every Possible Way**

Easy to Work With

Airflow Efficient

Crush Resistant

Flame Spread Proof

**UL2158A
Listed**

Better Performance in Every Way

You no longer have to fight with rigid or semi-rigid pipe in the name of safety. DryerFlex keeps all of the good features from airflow efficient rigid **and** workable slinky foil while discarding all of the defects.

Easy

Tight turns and bounce-back workability makes for quick connection times.

Smooth

A nearly flat interior that always maintains its 4" diameter maximizes efficiency.

Strong

Layered aluminum ribbon stands up to dryer push-back and fire.

DryerFlex is the only UL 2158A Class Zero transition hose that is available exclusively through service companies like yours. Be certain to upsell every ticket for efficiency, safety and quick service.

Yet Strong
