

Sleek Powder Coated Galvalume® Steel Cover

Let Homes Breathe

FreshVent

Construction standards for tight envelope homes can create negative pressure in the living area. Airtight homes need to have a means of bringing fresh air into the space and *conditioning* it to meet code and ensure a harmonious balance between intake and exhausted air.

Breathe easier! The **NEW** FreshVent from InOvate® supports new fresh air systems while maintaining exterior beauty.

Built tough from Galvalume® steel, with a durable powder coating, the FreshVent provides a polished finish that stands up to the test of time.

Balance Indoor Air Quality With Beautiful Outdoor Aesthetics

Select FreshVent™ to meet the needs of modern, energy efficient homes and their ERV, HRV, fresh air, and make-up air systems. This patented vent-port cover combines superior functionality with aesthetic excellence.

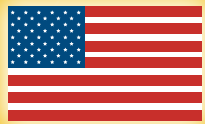

Deep-drawn 22-gauge Galvalume® steel, TGIC powder coating, and high-strength N52 magnets deliver durability for the long haul. Its low-profile design and clean lines allow exterior beauty to shine without distraction.

The FreshVent matches the quality and aesthetics of all InOvate® vents, including the DryerWallVent and Premium WallVent, ensuring a consistent exterior appearance across all ventilation terminations.
