

Balance Indoor Air Quality With Beautiful Outdoor Aesthetics

Let Homes Breathe

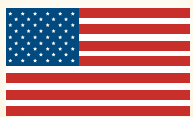

Beautiful Exteriors

Tighter construction envelopes require systems that allow your home to breathe. Providing proper access for ERV, HRV, fresh air, and make-up air systems is critical for indoor air quality. Now there is a way to open up your building without compromising exterior beauty.

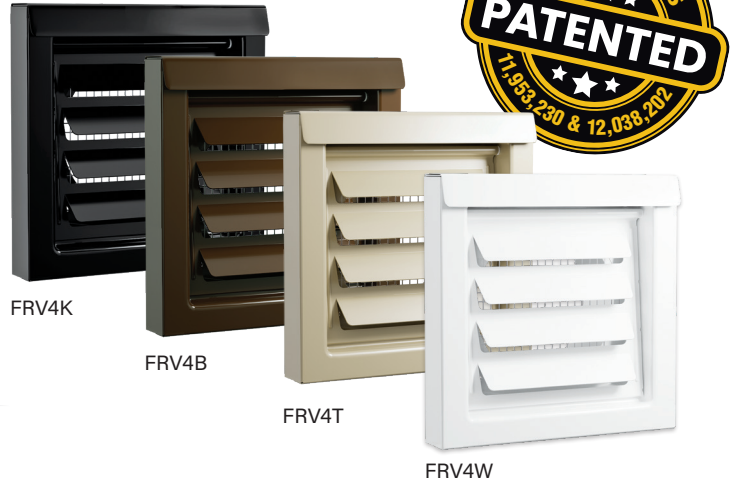

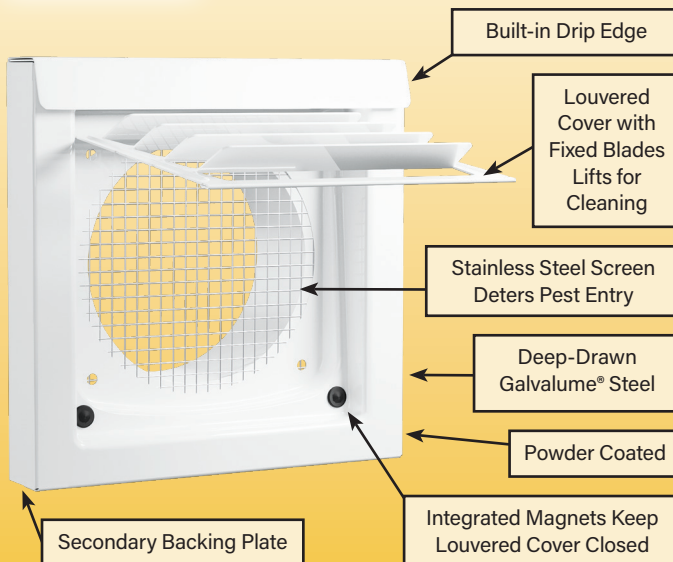

Sleek, Low Profile—Built Tough

Select the FreshVent™—designed and manufactured in the USA—for sleek lines, a low profile, and a consistently elegant appearance for your home.

Built tough from heavy gauge Galvalume® steel, its durable powder coating is cured to perfection, producing a polished finish that stands up to the elements.

Made in the USA

The FreshVent is available in black, brown, tan, white, and custom RAL colors for larger projects, *just like* the DryerWallVent and Premium WallVent from InOvate®.

Consistent Excellence

Teaming the FreshVent with the InOvate Premium WallVent and the DryerWallVent allows you to keep a consistent ultra-high quality look for every vent termination.

Visit FreshVent.com today to learn more about the InOvate advantage.
